DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 32, 35-37, 40 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsumoto et al. (4,915,296). Regarding claim 33, see 34.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 38 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsumoto et al. in view of Cornell, Jr. (2,115,706). Matsumoto et al. discloses all of the limitations of the claims except for employing a non-circulating tank. Cornell, Jr. discloses the presence of a non-circulating tank. See 29. Hence, one skilled in the art would find it obvious to modify the heating system of Matsumoto et al. to include the non-circulating tank of Cornell, Jr. for the purpose of energy conservation.

Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsumoto et al. in view of Schwarz (5,007,583). Matsumoto et al. discloses all of the limitations of the claim except for the releasing means being an open top. Schwarz discloses the presence of releasing

means being an open top. See **18**. Hence, one skilled in the art would find it obvious to modify the system of Matsumoto et al. to include the releasing means being an open top of Schwarz for the purpose of ease of manufacture.

Allowable Subject Matter

Claims 22-31 are allowed. Claim 39 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the voltage thermostat and instructions and fan coil unit must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
